Luke Cobb

Scenario:

You are a dog breeder and you work with dogs on a daily basis. You need to make sure you find the right dog food for your dogs but the issue is you do not want to spend a lot of money on dog food. You want to find the right dog food for the right price.

Task 1: Find a dog food that is for an English bulldog, that is overweight, and below 25 dollars.

Task 2: Search for a dog food that is for a Labrador and bookmark one that you seem interested in. After that navigate to where the dog food is bookmarked.

Task 3:

Notes:
1. No matter what screen you are on the app lets the user be able to return back to the home screen, click on favorites, click on bookmarked and go to profile.
2. Create a back button when the user reaches the results just in case the user needs to go back and change something.

1. The user likes the ability to be able to search for a specific dog.
2. The user likes the ability to favorite and bookmark items.
